

# Sodium Sulfite

## Solvay Chemicals, Inc. Melamine Statement for Sodium Sulfite

No melamine is intentionally added in the Green River, Wyoming sodium sulfite manufacturing process. Solvay Chemicals has not established what, if any, amount of melamine is in our sodium sulfite.

This material is manufactured through the mining and processing of trona which involves a series of heating, filtering and drying steps, the burning of sulfur to form sulfur dioxide and the resultant reaction of the two raw materials.

To our actual knowledge, the information contained herein is accurate as of the date of this document. However, neither Solvay Chemicals, Inc. nor any of its affiliates makes any warranty, express or implied, or accepts any liability in connection with this information or its use. This information is for use by technically skilled persons at their own discretion and risk and does not relate to the use of this product in combination with any other substance or any other process. This is not a license under any patent or other proprietary right. The user alone must finally determine suitability of any information or material for any contemplated use, the manner of use and whether any patents are infringed. This information gives typical properties only and is not to be used for specification purposes. Solvay Chemicals, Inc. reserves the right to make additions, deletions or modifications to the information at any time without prior notification.
